- **Familiar:** C++, Java, Vue, Php
- **Project Hosting**
- **Work with VPS and cPanel**

WORK EXPERIENCE

Webify Company, Kabul

Project Manager & Full-Stack Developer

Apr 2025 – Present

Reference: Mohammad Ashraf Mohammadi, CEO of Webify Company

- *Leading project planning, task assignment, and delivery tracking across multiple development teams.*
- *Managing client communication, defining milestones, and ensuring timely product releases.*
- *Developed full-stack web systems using Laravel, React.js, and Next.js.*
- *Integrated CI/CD pipelines and automated deployments using GitHub Actions and Docker.*
- *Managed production servers on Linux (Ubuntu), including Nginx configuration, SSL setup, and database optimization.*
- *Monitored uptime and performance using Prometheus & Grafana dashboards.*
- *Implemented backup strategies, network-level security configurations, and performance tuning.*
- *Provided mentorship and code reviews for junior developers.*

Naikbeen Control Panel Company

Full-Stack Developer

Oct 2024 – Mar 2025

Reference: Haroon Eraj, CEO of Naikbeen Control Panel Company

Email: info@ncp.af

- Developed and maintained complex web systems using **React.js, Laravel, MySQL, and Tailwind CSS**.
- Designed and implemented **RESTful APIs** for secure and efficient communication between servers and clients.
- Managed databases and optimized their performance to support large-scale data operations.
- Worked extensively with **cPanel and VPS** to manage hosting environments, domains, and email configurations.
- Delivered hosting projects for clients, ensuring high availability and performance for hosted websites and applications.
- Collaborated with design and development teams to create responsive and user-friendly interfaces.
- Monitored and managed **CI/CD pipelines** to streamline development and deployment processes.
- Troubleshoot issues and provided weekly reports to the management.

Tara Solutions Company, Kabul

Full-stack Developer

DEC 2023 – SEP 2024

Reference: Abbas Ataie, CEO of Tara Solutions

Email: abbas.ataie.montazer@gmail.com

- Designed, developed, and maintained scalable full-stack web applications using modern technologies such as **React.js, Laravel, and Ant Design**, ensuring responsiveness, performance, and user-friendly interfaces.
- Built and optimized relational database structures to support efficient data management and seamless backend operations.
- Implemented **CI/CD pipelines** to automate deployment processes, minimize human error, and ensure smooth delivery of application updates to production environments.
- Managed **GitHub repositories**, facilitated code reviews, and ensured adherence to clean code principles and best practices in collaboration with cross-functional development teams.
- Developed and integrated secure **RESTful APIs** to enable reliable data communication between client-side interfaces and server-side logic.
- Collaborated with designers and product owners to translate business requirements into technical specifications and deliver functional software solutions.
- Performed **debugging, performance tuning**, and continuous maintenance of existing systems to ensure long-term reliability and efficiency.
- Contributed to **agile development processes**, participated in sprint planning, and provided technical input during project discussions.

Light Code Organization, Kabul

Developer, and Programming Language Instructor

FEB 2022 – AUG 2023

Reference: Rustam Ali Hussaini, CEO of LightCode Organization

Email: rustam.ali.hussaini@gmail.com

- *Developing front-end using HTML, CSS, Bootstrap 5 and JavaScript, as well as back-end using PHP and Laravel.*
- *Teaching C++ Programming Language*

PROJECTS

Bamyan Entertainment – Online Ticketing Platform ([Live Demo](#))

BamyanEntertainment.de – Full-Stack Developer

Tech Stack: Laravel 12, Next.js, Radix UI, Tailwind CSS, MySQL

Developed a full-stack entertainment platform for managing cultural, music, and sports events. Implemented dynamic event and blog management, community & sponsor modules, gallery and newsletter systems with queued email notifications, role-based authentication, and integrated external ticket payments via Volek. Ensured responsive UI/UX with Next.js, Radix UI, and Tailwind CSS.

Job Portal System ([Live Demo](#))

Laravel 11, React, Ant Design, Tailwind CSS, Bootstrap 5

Developed a full-stack **job portal system** featuring user roles, job applications, job seeker insights, and employer tools. Implemented a ranking system, voting on insights, dynamic forms, and an admin dashboard for managing companies, jobs, and advertisements.

Gold Kingdom Forex Academy – LMS Platform ([Live Demo](#))

Laravel (Backend), React.js & Ant Design (Frontend) Built a Learning Management System (LMS) named **Gold Kingdom Forex Academy** with features like user role management (Admin, Instructor, Student), course and session scheduling, student/instructor profiles, integrated payments, and attendance tracking. Used Laravel for a robust backend with soft deletes and audit trails, and React.js with Ant Design for a responsive and modern frontend.

Gulbarg Cleaning Material Management System ([Live Demo](#))

A comprehensive cleaning material management system developed for **Sun Shine Group Company**, based in Kabul. The backend is built with **Laravel**, and the frontend is implemented using **React.js** and **Ant Design**. Key features include raw material tracking, packaging tools management, imported product handling, machinery records, sales, debt management, and transaction history logging.

Stock Sales Management System ([Live Demo](#))

Developed for Shahr-e-Qashang Company, this system manages categories, products, sales, and finances.

- Built with Laravel (backend), HTML, Bootstrap, CSS, JavaScript
- MySQL database for efficient data management
- Handles product categories, sales transactions, and financial records
- Optimized for performance and scalability

QR Code Generator System ([Live Demo](#))

A web-based application developed for Ahmadzai and Mohammad Ilyas Ahmadzai Trading Company. It manages personnel, users, and product data while generating custom QR codes for social media.

- Built with Laravel (backend) and React.js + Ant Design (frontend)
- Role & permission management for user access
- Employee management (roles, card numbers, blood types, status)
- Product and category management (agricultural, pharmaceutical)
- QR code generation with custom URLs for social media
- User status tracking (ACTIVE, INACTIVE, EXPIRED)
- Includes audit fields and soft delete functionality

Home.af ([Live Demo](#))

Developed for Home.af, a leading real estate platform, this website provides a seamless experience for users to browse, buy, and sell properties.

- **Property Listings** with detailed descriptions and images
- **Search Filters** to help users find properties based on location, price, and type
- **User Dashboard** for managing listings and transactions
- **Contact and Inquiry Forms** for easy communication between buyers and sellers
- Built with a user-friendly interface and optimized for a smooth property search experience
